

# LEGIONELLA-X 100

## Air Sterilizer

**Magna**  
Magna-Cl2 Pte Ltd

NATO Stock No. 4460-320798490

### FEATURES AND BENEFITS

- Eliminates viruses, bacteria and fungi in the air and on surfaces
- Removes all types of odour - bad odour, pet odour, cigarette smell
- No filters needed
- Maintenance free
- Silent Operation
- Revitalizes and refreshes stale air

#### overview

Airborne contaminants such as viruses, bacteria, bad odour, smoke and fumes from cigarettes and some household products are always surrounding us. Our constant exposure to these indoor air pollutants generate harmful effects on our health.

Now with the Legionella-X 100 ozone sterilizer, we can experience a safe, hygienic and healthy environment. The Legionella-X 100 significantly reduces germs, bacteria and viruses in the environment. It also effectively removes odours such as tobacco smoke, pet odours and other bad odours.

#### why choose Legionella-X 100?

##### works silently

The Legionella-X 100 does not use a fan or motor, so it is virtually silent.

##### durability

The Legionella-X 100 is designed to be durable. There are no mechanical parts such as fans or motors.

##### enriched oxygen

The Legionella-X 100 uses the latest ozone technology to refresh the air, and neutralize bacteria and odour, giving the room a pleasant and refreshing environment.

##### low power consumption

Its energy saving feature allows it to operate at a very low wattage and therefore the cost of maintaining a clean air environment is negligible.

##### maintenance free

The Legionella-X 100 is maintenance free. Unlike other air sterilizers which require cleaning and washing every few months, the Legionella-X 100 does not require routine chemical or water refill which easily incurs additional costs and time for maintenance. With the Legionella-X 100, you can enjoy a hassle free fresh air environment.

##### no timer required, no overheating

Since the Legionella-X 100 is designed and built for robust continuous 24 hours operation, there is no timer required to pause operation.

#### why do customers find the Legionella-X 100 effective?

It employs active cleaning technique. Enriched oxygen is produced to remove airborne contaminants by attacking the sources of pollution directly, thus removing the source of odour and germ problems.

#### specifications

##### Effective Area

up to 18 square meters (2.5 metres height)

##### Power Input

230V

##### Power Consumption

10 watts

##### Warranty

12 months

##### Test Report

SGS Tested (Report No.10032118/05)
